BUSINESS & OPERATIONAL IMPACT

Authentication, session hydration, and multi-tenant domain routing operate with zero customer-facing friction. Secure credential handling and OWASP password masking fully compliant.

Audit Scope & Findings:

Full end-to-end authentication audit completed across 5 discrete scenarios and 30 verified sub-steps. Multi-tenant routing correctly resolves tenant sub-domains, cookie consent dismisses cleanly, password masking toggles reliably, and brute-force credential errors reject unauthorized access safely.

0

P1 HIGH

0

P2 MEDIUM

0

P3 MINOR

✓ No blocking code defects identified. All executed functional checkpoints verified aligned with specifications.

Recommended Engineering Remediation

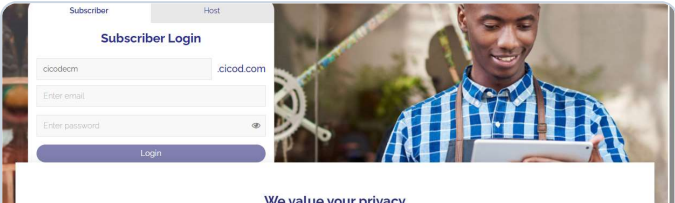

P3 Maintain session token expiration telemetry monitoring under high concurrency.
Subsystem: Auth Gateway

P3 Verify cross-browser autofill behavior for enterprise password managers.
Subsystem: Frontend Form
